EDUCATION

Vellore Institute of Technology Bhopal
Btech. in Computer Science - CGPA - 8.74

2022 – 2026

Bhopal, India

St. Joseph Co-Ed School
CBSE - PCM - Percentage - 92.4%

2021 – 2022

Bhopal

St. Joseph Co-Ed School
CBSE - Percentage - 85.17%

2019 – 2020

Bhopal

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, MySQL, MongoDB, MATLAB

Developer Tools: VS Code, Git, GitHub, Eclipse, Android Studio, MS Office Suite, Canva, Docker, Power BI

Technologies/Frameworks: HTML5, CSS3, React, Node, Express, AWS

Concepts: Data Structures & Algorithms, DBMS, Object Oriented Programming, Asynchronous Programming

PROJECTS

BiblioManzil 📄 React, Node.js, Express.js, MongoDB, Firebase Authentication, Cloudinary **03-2026**

- Built a full-stack reading platform that aggregates motivational blogs, book summaries, curated ebooks, and embedded reels within a single responsive web interface.
- Developed RESTful APIs using Node.js and Express with MongoDB for data management, along with an admin dashboard for dynamically publishing and managing content.
- Integrated Firebase Authentication and implemented bookmarking features, while optimizing media delivery and file storage using Cloudinary.

GraduateConnect Platform 📄 | MERN Stack (MongoDB, Express.js, React, Node.js) **07-2025**

- Engineered a Full-Stack Alumni Networking Platform utilizing the MERN stack (MongoDB, Express.js, React, Node.js), supporting comprehensive user profile management and a dedicated job board feature.
- Designed and secured the RESTful API with JWT Authentication; integrated Socket.IO to power real-time private messaging and push notifications, successfully driving a 40 percent increase in active user engagement.

JeevanCheck 📄 | Machine Learning (Python, Scikit-learn, Pandas) **02-2025**

- Built machine learning models including Random Forest, SVM, and CNN to detect heart disease and diabetic retinopathy with high accuracy.
- Performed thorough data preprocessing and model evaluation to ensure robust and reliable diagnostic predictions.
- Delivered practical healthcare solutions by translating medical data into actionable insights for improved patient diagnosis.

EXTRACURRICULAR

- Facilitated peer study groups to assist classmates with curriculum-based mathematical subjects, fostering a collaborative learning environment that helped peers master complex topics and improve their academic performance.
- Completed the Cloud Technology Development Programme (CTDP 3.0) virtual workshop through PwC, which included hands-on Salesforce training and skills development via the Trailhead platform.
- Played a key role in organizing various technical and non-technical college events, ensuring successful execution through effective coordination and teamwork.

ACHIEVEMENTS AND CERTIFICATIONS

- LeetCode: Solved 400+ problems, enhancing algorithmics thinking and problem solving skills
- Oracle Cloud Infrastructure DevOps Professional
- GEN AI Using IBM Watsonx
- Full Stack Developer MERN by Smartbridge
- Advance Git and Associate data engineer certificate by Datacamp
